

NO! Cell phones should not be permitted on airplanes!!!

Cell phone use will make air flight intolerable, preventing travelers from sleeping, allowing one person to ruin a night for 300 people, raising the danger of air rage, and hurting the economy by making flight less enjoyable, thus discouraging flight and preventing businesspeople from getting adequate sleep. This is a terrible idea. It is a case when technology permits a step that should never be taken. Do not allow cell phone use in flight, for safety's sake.
